SUMMARY

B.Tech CSE (AI/ML) student graduating in 2027 with an **8.688 CGPA** and **400+ DSA problems solved**. Hands-on experience in **Java, Python, SQL, full-stack development, REST APIs and backend systems**, with practical exposure to AI/ML through project-based work. Strong foundation in Data Structures & Algorithms, databases and software development.

EDUCATION

Galgotias College of Engineering and Technology B.Tech in Computer Science and Engineering (AI & ML), CGPA: 8.69/10 Honours: Cyber Security (Pursuing)	Greater Noida, India 2023 – 2027
V Pandey Memo Gyan Niketan School Senior Secondary (PCM), CBSE: 94.67% High School, CBSE: 95%	Daltonganj, India 2023 2021

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, SQL
Frontend/Backend: React.js, Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB, MySQL, PostgreSQL
Libraries/AI: NumPy, Pandas, Matplotlib, Scikit-learn, Sentence Transformers, Pydantic, Groq LLM API
Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle
Coursework: Data Structures & Algorithms, Machine Learning Techniques, OOP, DBMS, Operating Systems, Computer Networks
Soft Skills: Teamwork, Communication, Leadership, Adaptability

PROJECTS

ResumeIQ – AI Resume Matcher - Built an AI-powered resume screening system using Python, Groq LLM, Pydantic, pypdf and python-docx to parse multiple PDF/DOCX resumes and extract structured candidate information including skills, education, experience, projects and certifications. - Developed an LLM-based job description parser and resume matching pipeline to identify required/preferred skills, evaluate experience and generate an overall candidate-job match score with explainable matching details. - Implemented automated candidate ranking by processing multiple resumes, comparing them against a job description, and identifying the top and lowest-matching candidates based on their scores.	GitHub
LeadDeskMini - Built a full-stack lead management application using React.js, Node.js/Express.js and MongoDB to manage and track customer leads. - Developed RESTful APIs and CRUD operations for lead creation, updating, retrieval and deletion with persistent database storage. - Integrated frontend and backend APIs with reusable components for a responsive and maintainable application.	Live — GitHub
KatherinAI — AI Portfolio Assistant - Built an AI-powered portfolio assistant using React.js, FastAPI, Python and Groq LLM API to provide conversational responses about my skills, projects, experience and achievements. - Developed a resume-grounded knowledge pipeline using PDF parsing and structured candidate data extraction, enabling the assistant to generate responses based on verified profile information. - Implemented prompt engineering and context-aware response generation to ensure accurate and relevant answers while limiting responses to available candidate information. - Deployed the React/Vite frontend on Vercel and FastAPI backend on Render, integrating REST APIs and CORS for reliable end-to-end communication.	Live — GitHub

ACHIEVEMENTS

- Qualified at College Level – Smart India Hackathon 2025**, representing Galgotias College of Engineering and Technology.
- 400+ DSA problems solved** across LeetCode, GeeksforGeeks, HackerRank and CodeChef.
- Top Performer – Tech Synergy Coding Contest 2026**

Certificate

CERTIFICATIONS

Infosys Springboard – Data Structures and Algorithms using Python - Part 1
Infosys Springboard – Database Management System Part - 1
